SUMMARY

Full-Stack & AI Engineer with 1+ year of internship experience delivering production web and mobile applications. 2x hackathon winner across 8 national and international competitions, shipping AI systems with 90%+ accuracy. Experienced in Java, Python, React, backend APIs, SQL, and data structures, with a strong record of rapid problem-solving and execution.

EDUCATION

Sinhgad College of Engineering <i>Bachelor of Engineering in Computer Science, Minor in Data Science CGPA: 8.23</i>	Pune, Maharashtra <i>Aug. 2023 – May 2027</i>
School of Scholars <i>Higher Secondary Education (Class XII) Percentage: 91.4%</i>	Nagpur, Maharashtra <i>2023</i>

EXPERIENCE

Mobile Application Developer <i>InvizioX</i> - Engineered InvizioX, a cross-platform mobile app using React Native and Expo; reduced load time by 30% and improved retention by 20%, as lead frontend developer - Architected 7+ frontend modules for dashboards, portfolios, and transactions; reduced navigation time by 25% - Built real-time analytics dashboards with WebSockets; improved monitoring efficiency by 40% and reduced manual refreshes by 50% - Implemented a reusable UI system using NativeWind, JavaScript, and Expo EAS; standardized styling across tested Android devices and cut development time by 30%	Jan. 2026 – June 2026 <i>Mumbai, Maharashtra</i>
Full Stack Web Developer <i>E-Cell SCOE</i> - Delivered full-stack applications for 3+ startups using React.js, Next.js, Node.js, Express.js, and Flask - Built responsive interfaces using React.js, JavaScript, and GSAP; increased conversion by 30% and reduced bounce rate by 18% - Integrated SQL and Docker; improved query performance by 35% and reduced deployment errors by 40% via containerization - Delivered 4 product launches and 10+ feature enhancements; improved efficiency by 30% and reduced post-launch bugs by 20%	Nov. 2023 – April 2024 <i>Pune, Maharashtra</i>

PROJECTS

AgriGuardian: AI Crop Disease Detection <i>React Native, FastAPI, Python, OpenCV, TensorFlow, Supabase</i> - Engineered an AI agriculture platform using React Native, FastAPI, and Supabase; reduced field inspection time by 45% - Developed a CNN disease-detection pipeline using VGG16, InceptionV3, ResNet50, and OpenCV; achieved 94% accuracy and reduced diagnosis time to under 5 seconds - Integrated 6+ IoT sensors with weather APIs and 15-language localization; increased farmer accessibility by an estimated 40% - Implemented AI treatment and agro-shop recommendations with Gemini and LangChain; reduced crop losses by 20% in testing
Document Intelligence Hub <i>Next.js, FastAPI, LangChain, FAISS, MySQL, Hugging Face</i> - Engineered an offline multimodal RAG platform for PDF, DOC, image, and audio retrieval; reduced search time by 60% - Built OCR, speech-to-text, and vector search pipelines using FAISS, Whisper, and Hugging Face; achieved 90%+ retrieval accuracy - Implemented citation-backed semantic search using FastAPI, MySQL, Gemma, and Mistral; reduced hallucinated responses by 35% - Designed a scalable offline-first architecture for secure retrieval; enabled 100% offline processing with zero data transmission
EchoGuide: AI Vision Assistant <i>Python, Computer Vision, YOLOv8, OpenCV, PyTorch, Deep Learning</i> - Designed a voice-assisted navigation tool for impaired users; improved navigation accuracy by 85% and reduced obstacle incidents - Trained and deployed an object detection model with 92% accuracy; enabled real-time obstacle alerts with latency under 200ms - Built a face detection and recognition system with 95% accuracy; enabled real-time contextual voice feedback

TECHNICAL SKILLS

Languages: Java, C++, Python, JavaScript, TypeScript
Core CS: Object-Oriented Programming (OOP), Data Structures & Algorithms, Database Management, Operating Systems, Software Engineering Principles, System Design, Computer Networks
Backend & APIs: FastAPI, Flask, Node.js, Express.js, REST APIs
Databases: MySQL, MongoDB
Data & AI: Pandas, NumPy, Scikit-learn, Matplotlib, TensorFlow, OpenCV, LangChain
Frontend: HTML, CSS, React.js, React Native, Next.js
Developer Tools: Git, GitHub, VS Code, Docker

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- Competed in 8 national and international hackathons, securing 2 wins through innovative problem-solving and rapid execution
- Solved 350+ coding problems across **LeetCode** and other coding platforms, strengthening algorithmic problem-solving skills
- Volunteered with Prayas NGO to teach computer fundamentals and emerging technologies to children in rural and underserved communities, promoting digital literacy
- Organized free medical camps and participated in blood donation drives, supporting healthcare access and emergency medical needs in underserved communities
